

COURSE OVERVIEW PE0102 Certified Process Plant Operator Plant Operations, Control & Troubleshooting

Course Title

Certified Process Plant Operator: Plant Operations, Control & Troubleshooting

Course Date/Venue

October 06-10, 2024/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

(30 PDHs)

Course Reference PE0102

Course Duration/Credits Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

The situations abnormal process cost the processing industry billions of dollars a year. 40% of this lost is directly attributable to human errors, with the failure to properly troubleshoot the condition being the leading contributor. The operations team is the first line of defense against process upsets and equipment problems. Failure to identify and resolve these situations quickly can lead to lost production, off-spec product, equipment loss, and even catastrophic accidents. Therefore, the ability to troubleshoot process operations is one of the most valuable skills operations personnel can possess. However, in order to troubleshoot the process or equipment, you have to understand the theory laying behind such process and equipment. This is what this course all about.

The course is designed to provide participants with the proper application, operation, maintenance and troubleshooting of the various types of process equipment such as compressors, pumps, motors, turbines, turbo-expanders, gears, heat exchangers, piping systems, distillation columns, reboilers, pressure vessels and valves.

PE0102 - Page 1 of 14

The course will feature a unique blend of practical application experience and basic analysis methods. Its aim is to convey a thorough understanding of equipment operating principles and troubleshooting techniques.

The course covers the various process control and instrumentation methods such as pressure measurement, level measurement, temperature measurement, flow measurement, basic principles of control systems, P&ID, wiring schematics & diagrams, control valves and process considerations. It will equip participants with the basic tools and techniques for troubleshooting real-world problems. The use of the troubleshooting methodology defined in this course can greatly improve the ability of the operations team to troubleshoot effectively. With an improved understanding of troubleshooting principles, you will be better equipped to react to process upsets in order to prevent downtime and/or accidents.

The course includes a comprehensive e-book entitled "Operator's Guide to Rotating Equipment: An Introduction to Rotating Equipment Construction, Operating Principles, Troubleshooting and Best Practices", published by AuthorHouse, which will be given to the participants to help them appreciate the principles presented in the course.

Course Objectives

Upon the successful completion of this course, each participant will be able to: -

- Get certified as a "Certified Process Plant Operator"
- Apply a comprehensive knowledge and skills in process operations, process control and troubleshooting techniques
- Operate, maintain and troubleshoot process equipment such as centrifugal pumps, positive displacement & vacuum pumps, centrifugal compressors, displacement compressors, steam turbine & expanders, gas turbines & engines, fan & blowers, etc.
- Identify and differentiate various types of electric motors, gears & transmission equipment, heat exchangers, distillation columns, reboilers, condensers and explain how trays work
- Discuss the piping layout and components including the piping arrangements, specifications, fittings, etc.
- Distinguish the various measurement in process control such as pressure measurement, level measurement, temperature measurement and flow measurement and differentiate their corresponding principles
- Recognize the principles of control valves including its body types, cavitation, valve coefficient and characteristics and list the main types of actuators and accessories
- Apply systematic techniques in troubleshooting process operations and carryout successful troubleshooting activities
- Analyze the mental problem-solving process and demonstrate the use of the troubleshooter's worksheet
- Practice the rules-of-thumb techniques for troubleshooting of process equipment

PE0102 - Page 2 of 14

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK[®]). The H-STK[®] consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides a wide understanding and deeper appreciation of process plant operations and control for technical and operational staff.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures20% Practical Workshops & Work Presentations30% Hands-on Practical Exercises & Case Studies20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK[®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

PE0102 - Page 3 of 14

Course Certificate(s)

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a "Certified Process Plant Operator". Certificates are valid for 5 years.

Sample of Certificates

The following are sample of the certificates that will be awarded to courses participants: -

PE0102 - Page 4 of 14

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

Accredited The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Jamal Khaled is a Senior Process & Petroleum Engineer with over 25 years of practical experience within the Oil & Gas, industry. His experience covers Operation of Upstream & Midstream Process Facilities, Operation of Process Equipment (Fired Heaters, Heat Exchangers, Air Coolers, Piping, Pumps, Compressors and Process Control & Troubles hooting), Heat Exchanger Design, Operation & Maintenance, Surface Production Operations, Advanced Oil Wells, Separation & Oil Treatment, Treatment of Oily Produced Water, Gas Dehydration &

Sweetening, Compressors & Utilities System, Flare & Disposal Systems Operation & Troubleshooting, Heat Exchangers, Fired Heaters, Process Plant Startup, Commissioning & Troubleshooting, Oil Movement Storage & Troubleshooting, Gas Compression & Foundation, Gas Compression Train Operations & Maintenance, Gas Dehvdration (TEG) Principles. Operations & Maintenance. Gas Dehvdration (Mole Sieve) Operations & Maintenance, Acid Gas Removal (AGRU) Operations & Maintenance, Gas Fractionation & Separation Operations Principles & Practices, Gas Processing Chemical Treatment Principles, Advanced **Distillation** Operation, Control, Design & Troubleshooting, Troubleshooting Process Operation & Problem Solving, Process Plant Troubleshooting & Engineering Problem Solving, Process Equipment Operation, Process Plant Operation, Process Plant Optimization, Oil & Gas Field Operation, Oil Movement, Storage & Troubleshooting, Petroleum Refinery Process, Process Reactor Operation & Troubleshooting, LNG & LPG Plants Gas Processing, Refinery Process Operations Technology, Distillation Column Design & Operation, Gasoline & Diesel Fuel Technology, Gas Sweetening & Sulfur Recovery, Gas Dehydration Units, Gas Sweetening Units, Fractionation Towers, Gas Compressors, Sulphur Recovery (SRU) & Utilities, Steam & Heat Recovery Systems, Flare & Pressure Relief Systems, NGL Recovery & Fractionation and Refrigerant & NGL Extraction. Further, he is also well-versed in Oil & Gas Producing Wells, Well Head Design & Selection H2S, Sour Gas Compatible Material X-Mas Tree, Electrical Submersible Pumping (ESP) Operations, Desian Troubleshooting, Sucker Rod Pumping System Application, Operation, Troubleshooting & Maintenance, Well Integrity Management System, X-Mass Tree & Wellhead Operation & Testing, Artificial Lift Systems, Selection & Operation, Artificial Lift Surface Equipment, Advanced Stuck Pipe Prevention & Fishing Operation, Well Completion Design & Operations, Casing, Cementing & Fluid, Pipeline & Pigging Operations, HP/IP/LP Separation, Industrial Water Treatment System & Operations, H2S, Confined Space Entry, Permit To Work (PTW) and Authorized Gas Tester. He is currently the On Job Instructor/Trainer of Majnoon Oil Field.

During his career life, Mr. Jamal has gained his practical and field experience through his various significant positions and dedication as the **Oil & Gas Operation Instructor**, **OJT Operation Trainer**, **Operation & HSE Instructor**, **Operation & Competency Assessor/Internal Verifier**, **Operation Engineer**, **Operation Supervisor**, **Operation Section Head**, **Production Supervisor**, **Senior Operator** and **Senior Instructor/Trainer** from various international companies such as the AlFurat Petroleum Company (AFPC), ADCO, Basrah Gas Company-Iraq, North Rumaila NGL Plant, Anton Oilfield Services and Majnoon Oil Field-Iraq, just to name a few.

Mr. Jamal has a **Bachelor's** degree in **Petroleum Engineering**. Further, he is a **Certified Training of Trainer** (**ToT**), an **Authorized H2S Trainer**, a **Certified OPITO Competency Assessor**, an **Authorized Assessor/Verifier** in **Oil & Gas Operation**, a **Certified Instructor/Trainer** and has further delivered numerous trainings, courses, seminars, conferences and workshops internationally.

PE0102 - Page 7 of 14

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

	Valves
0730 – 0900	Valve Theory • Valve Types • Applications • Functions • Operation •
	Maintenance • Troubleshooting
	Process Control
0900 - 1000	Control History • Basic Measurement Concepts • Performance Terms • Basic
	Control Theory
1000 - 1015	Break
	Pressure Measurement
1015 – 1100	Basic Principles • Pressure Transducers-Mechanical • Pressure Transducers-
	<i>Electrical</i> • <i>Installation Considerations</i>
	Level Measurement
	<i>Main Types</i> • <i>Simple Sight Glass</i> • <i>Gauging Rods</i> • <i>Buoyancy Tape Systems</i> •
1100 – 1215	Hydrostatic Pressure • Ultrasonic Measurement • Radar Measurement •
	Vibration Switches • Radiation Measurement • Electrical Measurement •
	Installation Considerations
1215 - 1230	Break
	Temperature Measurement
1230 – 1330	Principles • Thermocouples • Resistance Temperature Detectors (RTD's) •
	Thermistors Non-Contact Types
	Flow Measurement
1330 - 1420	Basic Flow Theory • Differential Pressure Flow Measurement • Oscillatory Flow
1000 1120	Measurement • Magnetic Flowmeters • Ultrasonic Flow Measurement • Mass
	<i>Flow Meters</i> • <i>Installation Considerations</i> • <i>Impact on Overall Loop</i>
	Recap
1420 - 1430	Using this Course Overview, the Instructor(s) will Brief Participants about the
1120 1100	<i>Topics that were Discussed Today and Advise Them of the Topics to be Discussed</i>
	Tomorrow
1430	Lunch & End of Day Four

Day 5:	Thursday, 10 th of October 2024
	Control Valves-Body Types
	Principles of Control Valves • What Happens Inside a Control Valve? • Choked
0730 – 0900	<i>Flow</i> • <i>Cavitation</i> • <i>Flashing</i> • <i>Valve Coefficient</i> (<i>Cv</i>) • <i>Control Valve Types</i> •
	Valve Characteristics • Trim Characteristics • Control Valve Selection • Leakage
	Rates
	Control Valves-Actuators & Accessories
0900 - 1000	Main Types of Actuators • Linear Actuators • Rotary Actuators • Actuator
	Forces • Positioners • Fail Safe Actuators
1000 - 1015	Break
	P & ID, Wiring Schematics & Diagrams
1015 – 1100	Block Flow Diagrams • Process Flow Diagrams • Mass Balance • Piping &
1013 - 1100	Installation Diagrams • P & ID Symbols • HAZOP • P & ID Standards •
	Valves Standardization of Symbols Schedules Layout Drawings
	What is Troubleshooting?
1100 – 1215	Characteristics of a Troubleshooting Problem • Characteristics of the Process
	Used to Solve Troubleshooting Problems
1215 – 1230	Break

PE0102 - Page 10 of 14 PE0102-10-24|Rev.444|14 July 2024

1230 - 1245	The Mental Problem-Solving ProcessProblem Solving • Troubleshooting • Overall Summary of Major Skills & aWorksheet • Example Use of the Trouble-shooter's Worksheet
1245 - 1300	Rules of Thumb for TroubleshootingOverallTransportationProblemsEnergyExchangeHomogenousSeparationHeterogenousSeparationsReactorProblemsMixingProblems•Size-DecreaseProblems•SizeEnlargement•Vessels,Bins,Hoppers&StorageTanks"Systems" ThinkingHealth,Fire & Stability
1300 - 1315	<i>Course Conclusion</i> <i>Using this Course Overview, the Instructor(s) will Brief Participants about the</i> <i>Course Topics that were Covered During the Course</i>
1315 – 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical session will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the state-of-the-art simulators.
